Capital Allocation Pattern: Value

Pros:

- Consistent dividend yield above 2% backed by positive free cash flow

Cons:

- Operating margins declining for 3 consecutive years suggest pricing or cost pressure
- Dividend payout ratio above 100% means the company is paying dividends from reserves, which is unsustainable
- Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
- Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility
