Capital Allocation Pattern: Value

Pros:

- Strong free cash flow generation over 5 years signals healthy business fundamentals
- Operating profit margin above 25% indicates strong pricing power and cost discipline
- Consistent dividend yield above 2% backed by positive free cash flow
- Revenue growing slower than profits shows improving operating leverage and scale benefits

Cons:

- Dividend payout ratio above 100% means the company is paying dividends from reserves, which is unsustainable
- Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
